New changes:

Parser Options:

Limit search result number to:

Exclude Auctions when calculating Average Sale Price?

Including shipping cost when calculating Average Sale Price?

Including items sold with best offer accepted?

Please change "Exclude Auctions when calculating Average Sale Price?" to "Exclude auction items?"

Please change Parser to User

Please change including to Include (this was my mistake, I typed incorrectly on Skype)

Changes needed from previous discussion:

Sold: 123

Sell Through Rate is not calculating correctly. The image on the left is the data for available items and the image on the right is for sold items. The STR should not change. STR is # of items sold/# of items available to purchase. In this example, 321 items are available and 123 have sold. $123/321=38.32\%$. The extension should read 38.32% on all pages.

Just like Sell Through Rate, the data for Available should not change. The image below shows available and the image above shows sold. There are correctly 321 available but when filtered to sold it changes to 134. The # available and the # sold should remain the same on both screens as these do not change.
